

28<sup>th</sup> July 2020

**ASX Announcement**

**FLU & COVID SYMPTOMS MONITORING LAUNCHED, SALES IN JULY**

**QUARTERLY ACTIVITIES, CASHFLOW REPORT and OPERATIONS UPDATE**

*Quarter ended 30<sup>th</sup> June 2020*

Lifespot Health Ltd (ASX:LSH) ("Lifespot or the Company") is pleased to provide the quarterly activities and cash flow report and an update of operations.

Operational highlights are as follows:

- FeverTel launched to households and small business 27<sup>th</sup> July 2020
- Sales of devices commenced in early July for FeverTel™ "fit to work" system in large organisations
- Cash reserves as 30<sup>th</sup> June 2020 were \$486k
- Net cash used in the quarter for operating activities (\$332k)
- Successful capital raising of \$300k by private placement
- Jayex use case agreed, aiming for Q4 roll out

Cash reserves at the end of the quarter were \$486k. Net cash used during the quarter was \$332k, with \$116k invested in the development of the FeverTel™ platform, the migration of BodyTel™ & Seng Vital™ software assets and migration of Company web portals to Australia.

The Company also successfully completed a placement to sophisticated and professional investors raising \$300,000 from the issue of 9,090,909 shares.

**FeverTel by BodyTel™ flu & Covid symptoms monitoring launched for home and small business**

The Company launched the FeverTel™ Digital Thermometer and APP for sale to households and small business's on 27<sup>th</sup> July. The FeverTel™ Digital Thermometer can now be purchased online at <http://lifespot-health.com/fevertel-store> and the APP can now be downloaded from Google Play. The iOS APP has been submitted to Apple and now awaiting final approval.

The Company's FeverTel™ Digital Thermometer and APP allows families and small organisations of up to 10 people to track their body temperature and Flu / COVID symptoms via the FeverTel™ APP and Bluetooth connected dual mode digital thermometer.

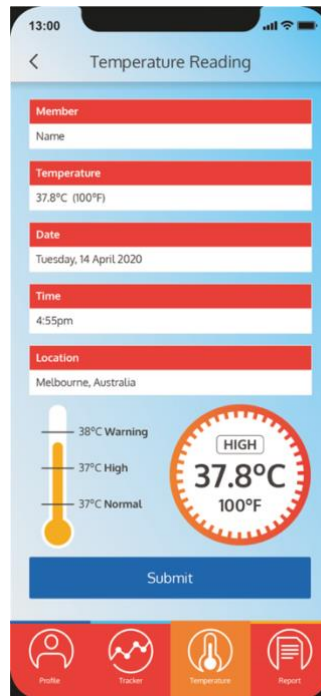

FeverTel™ dual mode infrared thermometer

TGA listed Medical device Class IIa ARTG 338311

The Company is pleased to provide two use cases examples of how the FeverTel™ Thermometer and APP can be used in home or in small business;

- Buy one thermometer for the **household**, download one version of the APP, track daily temperature and record any symptoms for the whole family (up to 10). The designated family member can review the reports page to note the trending data for the whole family.
- Buy one thermometer for a **small business** of up to ten employees, download one version of the APP, track daily temperature and record any symptoms for the whole office, warehouse or manufacturing facility (up to 10 per APP). The designated staff member(s) can review the reports page to note the trending data for the whole organisation.

The FeverTel™ APP is now available on Google Play with Apple App Store pending approval

### FeverTel™ “fit to work” integrated with BodyTel™

The Company has already commenced selling FeverTel™ devices into large organisations with the first order supplied in July. The Company is also well advanced in development of a dedicated large enterprise “fit to work” platform via BodyTel™. The Company will provide an additional update on FeverTel™ for large organisations and institutions in due course.

### Jayex License agreement

The Company and Jayex UK management have now completed the initial piloting stages of the first use case for the United Kingdom. Both parties are focused on launching during quarter 4 2020 and will continue to provide updates to the market as milestones are achieved.

### Seng Vital / Ionic Brands first vaporiser for USA recreational market

Following completion of tooling the Company has provided Ionic with the off-tooling prototype, however due to delays associated with COVID-19 the innovative smart vaporiser product is now expected to be launched in Ionic’s key distribution states in the USA during Q4 2020.

### **About Lifespot Health Ltd.**

#### CONNECTING HARDWARE WITH SOFTWARE – DIGITAL TECHNOLOGY FOR BETTER HEALTHCARE

Our core expertise is in connecting medical diagnostic devices and digital medicine delivery systems via Bluetooth and Smart device APPs to our cloud based ISO13485 accredited Bodytel patient management system. Our systems and applications are cloud and smartphone-based and easy to use.

We provide our diagnostic systems and medicine delivery platforms to healthcare enterprises for own branding white label contracts. Our German based BodyTel™ system is based on modern and future-proof internet technology utilizing advanced technologies such as document-based databases and biological neural networks.

Our German based Seng-Vital is specialized in development of hardware in the medical and non-medical Cannabis categories. In 2019 the company launched Medihale®, a digitally integrated medical cannabis vaporiser hardware and software solution that incorporates Bodytel App's to be the world's first fully integrated vaporising system. The Company continues to lead the way in innovative vaporiser hardware and software for OEM clients.
